

### Project Description:

Corrigan Chapman Construction Limited were appointed to construct a fully functional trampoline facility within the existing indoor tennis court area. This was inclusive of themed party rooms, toilets, changing and locker facilities.

The build comprised of jumbo stud walling, elevated walkways, safety handrails, security systems, audio installation, decorations, floor coverings, drainage, the trampoline and accessories installation.

As a design and build contract, it was important to achieve from the start a good working relationship between the Client, Architect, Structural Engineer and Local Authority. The success of this team was proven by the Client's absolute satisfaction with the quality of design and the high specification achieved within budget figures and the completion of the project on time.
