

Project Description:

The works at High Elms Golf Club consisted of reconfiguration of the reception area to create a more open and inviting space, the provision of a new external platform lift, new café servery reception with associated seating area and extended spike bar seating. The provision of upgrading changing and toilet facilities for the patrons of the Golf Club and visiting members of the public.

The refurbishment works were completed in two phases with temporary works sequencing provisions to keep facilities in operation during the construction works.
